

EDUCATION

Parul University	Vadodara, Gujarat
B.Tech (Computer Science and Engineering) CGPA - 8.50	November 2022 – April 2026
Green Valley High School	Vadodara, Gujarat
12 th (Senior Secondary School) 87%	June 2020 – June 2022
Tree House High School	Vadodara, Gujarat
10 th (Senior Secondary School) 92.33%	April 2011 – June 2020

SKILLS AND INTERESTS

- Programming languages and Tools:** Python, Java, SQL, MongoDB, Git, GitHub, Jupyter Notebook, VS Code, Microsoft Office Tools
- Machine Learning and AI:** Machine Learning Algorithms, Deep Learning, Convolutional Neural Networks (CNNs), Scikit-learn, TensorFlow, PyTorch, OpenCV, Model Training & Optimization, Hyperparameter Optimization, Predictive Modeling, Statistical Modeling, Model Evaluation Techniques
- Generative AI & NLP:** Generative AI, Large Language Models (LLMs), LangChain, Hugging Face Transformers, FAISS Vector Store, NLTK, SpaCy, Prompt Engineering, Retrieval-Augmented Generation (RAG)
- Data Analytics & Processing:** Data Cleaning, Data Preprocessing, ETL, Feature Engineering & Data Transformation, Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI, Data-Driven Reporting & Insights
- Web & API Development:** HTML, CSS, JavaScript, React.js, Express.js, Flask, FastAPI, REST APIs, Postman
- Cloud, MLOps & Development Practices:** Azure Fundamentals, Basic CI/CD Concepts, Agile Development Methodology, Experiment Documentation, Version Control
- Core Computer Science Concepts:** Object-Oriented Programming, Data Structures & Algorithms, System Design Fundamentals, Computer Networking
- Soft Skills:** Problem-Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability, Time Management

PROJECTS

FaceMask – AI-Based Attendance System
- Developed a real-time face recognition attendance system using FaceNet and OpenCV with >99% accuracy. - Optimized performance using embedding caching for faster recognition and startup time. - Built a Streamlit dashboard with live webcam integration and secure attendance monitoring.
VoyageAI – Smart Travel Assistant
- Built an AI-powered travel planner using LangChain and Google Maps API for personalized itinerary generation. - Integrated OpenAI GPT and FAISS for semantic travel recommendations and intelligent trip queries. - Developed a Streamlit interface with live map visualization and route optimization features.
MedAssist XR – AI Healthcare Companion
- Created an AI-powered healthcare assistant for symptom analysis and lab report interpretation. - Implemented an Agentic AI system using FastAPI and Groq LLM for conversational healthcare guidance. - Integrated Geoapify and Foursquare APIs for location-based healthcare insights and recommendations.

INTERNSHIPS

Celebal Technologies Pvt. Ltd.: Data Science Intern (Celebal Summer Internship)	May 2025 – July 2025
- Worked on real-world Data Science and Machine Learning applications during a remote internship, focusing on data pre- processing, model development, and analytical problem-solving. - Built and evaluated ML-based solutions using Python and industry-standard libraries while collaborating in a project-oriented, Agile learning environment.	

CERTIFICATES

Career Essentials in Generative AI: Microsoft	December 2025
Introduction to Generative AI: Google Cloud	December 2025
Python Essentials: Cisco	January 2024
Introduction to Data Science: Cisco	February 2024
